Description

Installed new version 213 using yum, isn't possible to print the test page.
I've two printer attached: a HP PSC 1610 all in one and a HP OFFICEJET PRO 8610 (network printer).

G.M. Anchieri

■ Priority changed from *major* to *Feedback pending*

w/o a log it's not possible to see whats going on.
please create a debug log.

are normal print jobs working?
